DETAILED ACTION

This action is in response to the Application received on 10 January 2009 in which claims 1-10 were cancelled, claims 11-14 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Clark (U.S. Patent No. 6,134,336).

Regarding claims 11, Clark teaches an acoustic converter for a portable device, comprising: a housing (102), comprising a membrane rear volume (202); an opening structure (204, 205, 208, 210), located on the membrane rear volume; internal walls (fig. 5; at 502, 504, 506) located on a rear wall of the device, wherein the internal walls form an acoustic channel through which sound is directed to the opening structure; and an acoustical blocking element (412, 426, 428), located over the opening structure, wherein the acoustical blocking element forms an acoustic seal between the opening structure and the rear wall.

Regarding claim 12, Clark teaches the acoustic converter according to claim 6, wherein the portable device is a telephone (fig. 1).

Regarding claim 13, Clark teaches the acoustic converter according to claim 6, wherein the internal walls comprise at least a single layer (fig. 5).

Regarding claim 14, Clark teaches the acoustic converter according to claim 6, wherein the internal walls are formed concentrically (figs. 2 and 5).

Response to Arguments

Applicant's arguments filed have been fully considered but they are not persuasive.

With respect to the Applicant's argument that Clark fails to teach *an acoustical blocking element and therefore does not form an acoustic seal between the opening structure and the rear wall*, the Examiner disagrees.

Clark clearly teaches an acoustic blocking member, wherein he states that the member 412 covering openings 426, 428 provides acoustic tuning/resistance of the frequency response (col. 8 lines 63 through col. 9 lines 6). Therefore, the rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
